

Adhesives Transfer Tapes

Adhesive Transfer Tapes are available on a new rotary die-cuttable paper liner. Designed to help you take full advantage of rotary die-cutting efficiency, these tapes give you the adhesive power your customers demand for die-cut graphic attachment and many other high performance industrial applications:

- Up to 400°F short term heat resistance
- Solvent resistance
- Reliable adhesion to metal and high surface energy plastics
- High ultimate peel strength to resist edge lifting
- High shear strength to resist slippage
- Short term repositionability for placement accuracy
